

## Drug & Alcohol Screening

---

In today's litigious environment, having an active Drug and Alcohol screening program has never been more important.

If a worker is under the influence, you can be held responsible for the actual damages an impaired employee can cause, as well as punitive damages that could cost you millions of dollars.

A drug and alcohol policy that includes pre-employment screening, random testing and education programs is essential to ensure that your company is protected.

Premier Medical Resources (PMR) offers a wide range of drug and alcohol screening services. We can administer your existing drug and alcohol-screening program or develop and implement a new program for you. Most companies receive a discount from their insurance company for implementing an employee-screening program.

PMR's Drug & Alcohol Program can include the following:

- 5 and 10-panel drug screens
- Hair and saliva drug screens
- DOT drug screens
- Drug testing program development
- Medical Review Officer Services
- Pre-employment programs
- Post accident programs
- Random programs
- Secure online results
- Onsite & Offsite collection sites
- Breath alcohol screening
- Blood alcohol screening
- Saliva alcohol screening

**Protect your company ... protect your employees with PMR drug and alcohol screening services today!**
